

DESIGN AREA

The canvases are full wrap, meaning the canvas is covered with your artwork (front and side wraps). The template represents the entire front of the largest canvas size. The artwork will scale down in proportion to cover all smaller canvas size options. In order to cover the sides of the canvas with your artwork, we take a sample from the front of the canvas and mirror that art sample to extend through the side wrap. This allows your artwork to be viewed from all angles.

The base of the canvas is white. Any absence of color within your design or transparency will be displayed as white. For a more in-depth explanation of image mirroring and suggested tips and tricks, please read the Best Practices provided within the teelaunch app prior to upload.

The Framed Art Prints use the same dimensions as the canvas wraps. The concept about absence of color or transparency being displayed as white is the same. Since the Framed Art Prints do not wrap around the side, there is no mirroring that will take effect.
